**DOI: <https://doi.org/10.55713/jmmm.v30i2.858>**

In my review article [1], there was a typing error in the equation (1) as,

$$T_c = \frac{\theta_D}{1.14} \exp\left(-\frac{1}{N_F V_{eff}}\right),$$

which should be corrected to

$$T_c = 1.13 \theta_D \exp\left(-\frac{1}{N_F V_{eff}}\right).$$

This is the standard BCS equation for the critical temperature [2].
